July 28, 2017

Dear Dr. Enzo Luigi Mitidieri,

We wish to submit a new manuscript entitled "Periodic solutions of Euler-Lagrange equations in an anisotropic Orlicz-Sobolev space setting" for consideration by Nonlinear Analysis: TMA.

We confirm that this work is original and has not been published elsewhere nor is it currently under consideration for publication elsewhere.

In this paper, we report on equations of Euler-Lagrange type in an anisotropic Orlicz-Sobolev space setting. This is significant because this issue has not been discussed in depth in the literature and because it is of interest in mechanic models. The paper should be of interest to readers in the areas of nonlinear ode, hamiltonian system, variational calculus and applications of Orlicz spaces.

Please address all correspondence concerning this manuscript to me at fmazzone@exa.unrc.edu.ar

Thank you for your consideration of this manuscript

Thank you for your consideration of this manuscript. Sincerely,

Fernando Mazzone
